Axel Edman. Unidentified group of people

1970s?

Fairbanks, Alaska?

[Conversation by a group of people taped over another a recording by Edman]

Tape starts with an unidentified group of people having a conversation. There's a sports program in the background at the beginning of the tape. Talk about the food they are eating. Questions about the recording working or not. Personal talk about someone named Bobby. Talk about being in Barrow. Question about the Nenana ice going out and conversation about dates when the ice went out. Conversation about winning the ice pool and taxes. Several people talking at the same time throughout most of the recording. Conversation about Umiat. Talk about working for the NC Company.

Second side of the recording is Edman continuing to talk about his adventure. Almost all of Edman's recording is not understandable because of the conversations recorded over it. Edman talked about helping a doctor during their trip to Nome. They arrived in Nome on August 26, 1926.
