Patrick Durand talks about the Engine 557 Engine Restoration Mission

January 20, 2016

Series: Pioneer Park Railway Museum Rail Tales Lecture series

Patrick Durand talked about the materials that have been reproduced by the Strasburg Railroad. They have been ordering spares.

He described the air compressor for the brakes for the train. They have a lot of subassemblies waiting for the locomotive to come together.

He showed a list of the corporate in-kind donors and talked about their donations.

They have had visitors to their warehouse workshop including students and scouts.

They have put up displays advertising their work at different functions.

He talked about the new door that was constructed to bring the locomotive outdoors for work.

Durand showed photos of work on the locomotive, their current board of directors, and various parts of the locomotive.

Durand talked about various donations and their volunteers. Governor Walker has visited their project. Durand hopes to have their project completed by 2018.

Ron Inouye thanked Patrick Durand and Martin Gutoski. He announced the upcoming program.

A short video clip of work on the riveting is shown.
