History of Radio Science at UAF
By Bob Hunsucker
17 December 1987

Bob delivered a great overview of radio science at the University of Alaska in Fairbanks from the Universities inception to 1987.

This thumb drive has one file on it, a 1.86 Quick Time movie I made of the retirement seminar of Bob Hunsucker at the Geophysical Institute.

Bob said in the video that he planned to leave a printed copy with GI director Syun Akasofu. But we have not yet found a copy.
